ANNM Exhibition of video installation

The screenshot shows the ANNM website for the 'Adrift' exhibition. The browser address bar displays 'https://www.sea.museum/whats-on/exhibitions/adrift'. The website header includes the 'MUSEUM' logo and navigation links: 'WHAT'S ON', 'VISIT', 'DISCOVER', 'LEARN', 'SUPPORT', 'ABOUT', 'VENUES', 'STORE', and 'BUY TICKETS'. The main content area features a dark background with a glowing map of the Pacific Ocean, showing 'NORTH PACIFIC' and 'SOUTH PACIFIC' regions. The title 'Adrift' is prominently displayed, followed by the subtitle 'Planktonic journeys'. A 'FREE' badge is visible, along with the dates '22 Jun - 01 Dec 2020' and hours '10.30am-4pm daily'. Below the main content, there is a breadcrumb trail 'WHAT'S ON > EXHIBITIONS > ADRIFT' and a note 'FREE with museum entry'. A descriptive paragraph states: 'Come along and see 2000 virtual marine microbes as they drift in a simulated ocean environment! This installation is part of the citizen science project *Adrift*.' Below this is a video player thumbnail for 'Adrift - An Online Citizen Science Project' with a play button and the text: 'Using real data from the ocean's currents, you will help us map their journey as they move around the globe.'
