FOREWORD

Bibliographies, while never complete in their coverage, are useful in a 'broad brush' sense in capturing the current state of play in a particular area of research. This publication seeks to do this in the context of the Australian event field.

The publication of this bibliography is designed to coincide with the holding of the first Australian conference dealing with research in the events area – Events Beyond 2000: Setting the Agenda.

It is intended to produce a more extensive version of this publication in 2001. To this end, participants in the conference and other users of the bibliography, are encouraged to add to the listings of event research and publications. A page has been provided at the end of the bibliography for this purpose.

References to the Olympic Games are not included in this bibliography, and can be found in:

Burkhardt, A, Toohey, K. and Veal, A. (1995) *The Olympic Games: A Bibliography*, Centre for Leisure and Tourism Studies, University of Technology, Sydney, Lindfield, NSW.

This bibliography is updated periodically and is available electronically at:

<http://www.business.uts.edu.au/leisure/research/olympic.html>

We hope that you find this bibliography useful in the context of reviewing and locating relevant literature on the events field.
