Research Thesis

**Leadership Practices for Innovation
In High-Technology Organisations**

By

Grant Allen

**Submitted in fulfilment of requirements for the degree of
Doctor of Philosophy in Information Systems**

University of Technology, Sydney

September, 2014

CERTIFICATE OF ORIGINAL AUTHORSHIP

I certify that the work in this thesis has not previously been submitted for a degree nor has it been submitted as part of requirements for a degree except as fully acknowledged within the text.

I also certify that the thesis has been written by me. Any help that I have received in my research work and the preparation of the thesis itself has been acknowledged. In addition, I certify that all information sources and literature used are indicated in the thesis.

Signature of Student:

CERTIFICATE OF ORIGINAL AUTHORSHIP	iii
Index of Figures	vii
Index of Tables.....	viii
Acknowledgements.....	ix
Abstract.....	x
Chapter 1 – Thesis Introduction.....	1
1.1 Introduction.....	1
1.2 Background to this Research	2
1.3 Current Research Concerns and Issues.....	4
1.4 Research Area and Questions.....	5
1.5 Contributions of this Research to the Field.....	6
1.6 Situation and Chronology of the Research	6
1.7 Structure of this Thesis	7
Chapter 2 – Literature Review	9
2.1 Introduction.....	9
2.2 A Brief Review of the Literature on Leadership.....	10
2.2.1 Exploration of the Historic and Classic Notions of Leadership	10
2.2.2 Trait-based Leadership.....	11
2.2.3 Behaviour-based Leadership.....	13
2.2.4 Situational Leadership	14
2.2.5 Transactional Leadership / Transformational Leadership.....	15
2.2.6 Informing Future Thinking on Leadership	16
2.3 A Review of Literature on Leadership Factors Affecting Innovation.....	17
2.3.1 Leadership and the Organisation's locality and situation.....	17
2.3.2 Leadership and the Influence of Government Policy	20
2.3.3 Leadership Support for the Role of Brokers in Industry and Between Organisations	21
2.3.4 Team or Group Selection, Formation and Critical Mass	22
2.3.5 The Role, Effect and Potential of Knowledge Custodians.....	24
2.3.6 Incentives, Rewards and Compensation	25
2.3.7 The Role of Brokers in the Micro-environment	27
2.3.8 Organisational Structure, Rigidity and Formalism	29
2.3.9 Porosity of Boundaries Within and Between Organisations.....	31
2.3.10 Understanding and Exploitation of Social Capital.....	32
2.3.11 Learning Culture and the Learning Organisation.....	36
2.3.12 The Role of Leaders and Leadership	37

2.3.14 Determinism and Prescribing Knowledge Realisation and Innovation	39
2.3.14 Emergent Knowledge Realisation and Innovation as Strategic Intent.....	40
2.4 Conclusion	41
Chapter 3 - Research Methodology	43
3.1 Introduction.....	43
3.2 Purpose of the Research.....	43
3.3 Research Question	44
3.4 Research Objectives and Outcomes.....	44
3.4 Research Audience.....	44
3.5 Research Contribution	44
3.6 Ontological Assumptions Underpinning the Research	44
3.7 Epistemological Assumptions Underpinning the Research	45
3.8 Research Methodology	46
3.8.1 Action Research	47
3.9 Research Methods.....	48
3.9.1 Selection of Participants in the Research.....	48
3.9.2 Data Gathering.....	48
3.9.3 Data Handling	49
3.9.4 Data Analysis	49
3.9.5 Potential Problems and Constraints	50
Chapter 4 – Data Presentation.....	51
4.1 Introduction.....	51
4.2 Overview of Action Research Field Work.....	51
4.3 Group One – Emergent Leadership Peer Support Group.....	52
4.3.1 Background	52
4.3.2 Cycle 1 – Initial Meeting	53
4.3.2 Cycle 2 – Pair and group forming – practices important to “leadership confidants”	57
4.3.2 Cycle 3 – a reflection and peer support session.....	62
4.3.2 Cycle 4 – Ongoing Leadership Confidant sessions	67
4.3.2 Cycle 5 – Seeking longitudinal structured follow up.....	71
4.4 Group Two – Acquired Group from M&A	76
4.4.1 Background	76
4.4.2 Initial Engagement, Analysis and Theorising	76
4.4.3 Outline of Action Research cycles.....	78
4.4.3 Cycle 1 – Exploring Personal Background.....	78
4.4.3 Cycle 2 – Team History	83

4.4.3 Cycle 3 – New Priorities 1	92
4.4.3 Cycle 4 – New Priorities 2	99
4.4.3 Cycle 5 – Democratic Derailment.....	103
4.4.3 Cycle 6 – Stop, Start, Continue.....	108
4.4.3 Cycle 7 – Commitment	112
4.4.3 Cycle 8 – Where Are We Now?	118
Chapter 5 – Data Analysis and Discussion	126
5.1 Introduction.....	126
5.2 Summary of Data Sources	127
5.3 Analysis of Leadership Practices Emerging from the Research	128
5.3.1 Seeing self-in-the-other and other-in-the-self.....	130
5.3.2 Intellectual humility	131
5.3.3 Negotiated Order.....	134
5.4 Technical Innovations Achieved Through the Action Research	137
5.4.1. Technological Innovation in Network Management.....	138
5.4.2 Technological Innovation in Software Security Mechanisms.....	139
5.4.3. Technological Innovation in the revolutionary DTech Validation product.....	140
5.4.4. Technological Innovation in the dramatically changed DTech Reporting System	141
5.5 Contribution of Findings to the Answering of the Research Question: What are the Leadership Practices for Innovation Realisation in High-Tech Organisations	142
Chapter 6 – Thesis Conclusion	145
6.1 Research Questions and Approach.....	145
6.2 Thesis Findings	146
6.2.1 Seeing Self-in-the-Other and Other-in-the-Self.....	147
6.2.2 Intellectual Humility	147
6.2.3 The Creation of a Negotiated Order.....	147
6.2.4 Intelligent Caring	148
6.3 Technological Innovation Developed in Parallel to the Research	148
Appendix A: List of References.....	151

Index of Figures

2-1 Typologies of Internal Knowledge Brokers

2-3 Social capital value variability as a function of peer number

3-1 Continuing cycles of action research, embodying the concept of praxis

4-1 Anecdotal leadership practices collected from the group

4-2 The whiteboards chosen to explore team history and its impact on innovation

4-3 The highlights of team history from 2008 to 2011

4-4 Highlights of the team history from 2011 to the point of this Action Research Cycle

4-5 Developing set of new priorities as part of Action Research cycle 3

4-6 Results of the Stop, Start and Continue activity

Index of Tables

- 4-1 Leadership Confidant Participants, Department and Projects
- 4-2 Leadership Confidant Potential Conflict-of-Interest Mapping
- 4-3 Leadership Confidant Groupings
- 4-4 Key leadership and innovation points from first Leadership Confidant meetings
- 4-5 Summary of Leadership Confidant session meetings
- 4-6 Action Research Cycles for DTech Group
- 4-7 Data on Peer Review engagement before and after Action Research
- 4-8 Data on rollback frequency and stories before and after Action Research
- 4-9 DTech Group's decisions on what to stop, start and continue as a group
- 4-10 Challenges to the DTech team's new commitments to innovate, and team responses.
- 4-11 Change in DTech team composition over the 2012 year of Action Research
- 4-12 Observations on Leadership Practices, Innovation and Culture after one year of AR

Acknowledgements

I would like to acknowledge the following people for the support, assistance and encouragement during the years of this research.

- Ken Dovey, who in agreeing to be my supervisor set me on a path I never thought I'd follow. Ken also acted as mentor, friend and the voice of reason at many times during the research,
- The teams at ABC Company, who in good humour and with great enthusiasm embarked on this crazy idea with me,
- My wife and greatest friend, Lindsay, who laughed in all the right places, and was endlessly supportive and encouraging.

Many thanks to all of you.

Abstract

Organisations the world over are constantly striving to innovate in order to survive and thrive in the current dynamic and challenging global economy. The strategic intent to innovate is, however, very difficult to execute, especially in large enterprises.

This research set out to explore the leadership dynamics of innovation within an iconic global high-technology organisation. In particular, the intention was to understand the dynamics of those practices that facilitated the conversion of creative ideas into innovative new technical products and services in a sustained, repeatable manner. To achieve this, it was recognised that the study of these ‘social practices’ necessitated the location of this research within the social constructionist research paradigm. This led to the adoption of an Action Research methodology as the most appropriate method through which to address the research question.

Over the course of two years, two separate sets of Action Research cycles were conducted by two groups of co-researchers employed within this high-technology organisation. This Action Research delivered several novel insights into the nature of the leadership practices adopted by the members of these two groups in delivering, in particular, four break-through technical innovations. Together, these leadership practices transformed the social dynamics (and particularly the power relations) within the two groups, making possible the collaborative endeavour that led to the company-lauded technical innovations. The principal finding of the research - that *social innovation precedes technical innovation* – highlights the role of leadership in the realisation of innovation within enterprises. Furthermore the explicit articulation of four specific leadership practices that facilitated the conversion of creative ideas into the innovative new technical products and services achieved through this research, contributes significantly to the body of knowledge on innovation. In addition, this research raises questions about the appropriateness of the ontological and epistemological assumptions that underpin traditional, positivist research, with respect to investigating the social underpinnings of technical innovation. By locating this research in the social constructionist paradigm, and adopting an Action Research methodology, the socially constructed realities of organisational life – and, in particular, the political basis of these realities - were explored fruitfully with respect to their impact upon an organisation’s capability to innovate.
